Od subote ISO ne radi najbolje, odnosno sam sajt euprave je proglašen rizičnim jer njegov sigurnosni sertifikat više nije važeći.

Ovaj se lako rešava, samo kliknite na dugme Continue i nastavite sa radom, međutim neki računari imaju uključenu opciju koja sprečava nastavak rada pa ne postoji dugme za nastavak, to otprilike ovako izgleda:

Ovde je rešenje malo komplikovanije, a radi se tako što se na računaru u servisima mora ugasiti Windows firewall.,

1. Kliknete na START dugme i u polje za pretragu kucate "Services", u samom vrhu pojavljuje se program Services na koji treba da kliknete.

2. Kada se otvori prozor sa servisima, na desnoj strani pronađite "Windows Firewall" (Windows zaštitni zid)i kliknite desnim tasterom na njega. Zatim na Properties ili Svojstva zavisi od jezika windowsa.

Nije potrebno resetovati računar, nakon ovoga bi sve trebalo da radi.
